

We are pleased to announce that Macron has developed a driver solution for 0-10V Dimming application on your LED concept. In addition, to ensure the best dimming performance with your LED product, following dimmers are recommended. We continue to actively test and review our dimmer and controls compatibility to ensure the utmost quality you've come to expect from Macron. As such, we plan to expand this list rapidly as our testing teams verify the performance of today's common marketplace lighting controls.

If you have any further questions or would like to learn more about these efforts, please contact Macron LED Lighting Customer Service.
